STORVAULT

StorVault Server is an online backup and recovery service designed to accommodate business-critical data residing on **dedicated servers** or **virtual machines**.

The challenge

Businesses are faced with the need to drive down ʀᴜnaway costs caused by explosive growth in operational and application data, that needs to be stored, constantly backed up and retained according to the highest possible standards of risk management, corporate governance and legislative compliance.

The solution

With support for a broad range of operating systems, applications and databases, StorVault Server helps to guarantee that all corporate data is protected and can be accessed or restored to full operational readiness whenever needed.

StorVault Endpoint:

Flexible solution – Data protection for physical servers or virtual systems

Secure next-level technology – High-level security ideally positioned to replace tape backup

Usability and accessibility – Cloud-connected, automated backups with self-service restore; no additional hardware needed

Cost-efficient – Frees up costly on-site primary storage resources and capacity requirements

Data encryption at source – Advanced encryption (AES 256-bit) for data at rest and in flight

Reduced data footprint – Backup data is compressed to minimise impact on primary network and accelerate cloud uploads

Continuous data protection – Internet-optimised incremental backups, with compression and de-duplication

Automation and synchronisation – Once seeded, only incremental backups are performed since the last backup routine

Controlled, **easy-to-use web console** – Enables monitoring and reporting of all backups, verification and restore operations anywhere, anytime

Rapid recovery – Easily retrieve and recover files, backup data is always online and accessible

Limitless scalability – Value-for-money pay-as-you-grow rates

About StorVault

StorVault specialises in Cloud Storage, via a world-class data centre located in South Africa. We provide high performance, cost-effective, secure and reliable offsite, Cloud-based backup services through a nationwide network of fully-certified professional business partners and authorised resellers. Our current offerings include flexible Personal, Business and Microsoft 365 data backup and storage solutions.
